

🌱 GREENTECH INNOVATION

Don't Throw It. ReKart It.

Building India's modern, organized, and accessible recycling framework for urban households and institutions.

FOUNDING TEAM

👤 **Shamik Banerjee** (Founder)

👤 **Protim Sarkar** (Co-Founder)

👤 **Himanshu Bansal** (Co-Founder)

👤 **Kalyan Barik** (Co-Founder)

▲ THE PROBLEM

India's Recycling System is Broken

🏠 Households continually accumulate dry recyclable waste with no structured outlet.

📦 Recyclables remain stored for long periods, taking up valuable urban living space.

🗑️ Valuable dry waste ends up mixed in general garbage bins and landfills.

Unsorted Household Waste Streams:

📦 Cardboard

📰 Newspapers

🗑️ Plastic Containers

🗑️ Metal Cans

👕 Old Clothes

🔌 E-Waste

Recycling Is Still **Inconvenient**

Everyday urban citizens face friction at every step of the disposal process.

- 1 Recyclables accumulate at home
- ↓
- 2 Storage becomes inconvenient & cluttered
- ↓
- 3 Disposal options & schedules remain unclear
- ↓
- 4 Collection is irregular or unavailable
- ↓
- 5 Recoverable materials are lost to landfills

A Fragmented Ecosystem

Households

Want convenient, reliable pickup for dry recyclables but lack a trustworthy channel.

Isolated

Institutions

Generate high volumes of mixed waste without streamlined segregation pathways.

Unassisted

Local Collectors

Operate in unstructured setups with unpredictable supply and manual friction.

Uncoordinated

Recycling Ecosystem

Factories receive contaminated or insufficient materials, breaking circularity.

Inconsistent Supply

“The problem isn't the absence of recycling. It's the lack of a simple, organized experience.”

Valuable Resources Are Being Lost

✓ Useful Resource → Unmanaged Waste ✗

Clean cardboard, high-grade polymers, metals, and textiles deteriorate quickly when mixed with wet garbage, converting reusable raw materials into environmental hazards.

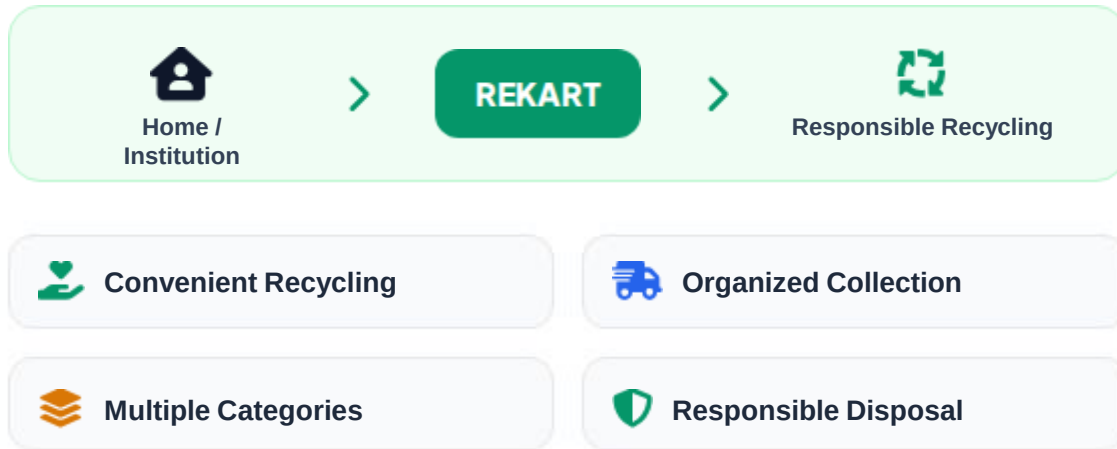

“What looks like waste can still have value.”

💡 THE PROPOSED SOLUTION

Meet ReKart

A Greentech platform designed to make responsible recycling simpler, more convenient, and more accessible.

VALUE TRANSFORMATION

From Waste to Resource

ReKart enables a clean transition path that keeps valuable materials inside the industrial supply chain.

1. Recyclable Waste

Sorted household & institutional dry recyclables.

2. ReKart Platform

Organized channel making recycling accessible.

3. Circular Economy

Clean materials repurposed for a sustainable future.

Making Recycling **Simple**

✗ TODAY

- ✗ Recyclables accumulate at home
- ✗ Disposal is inconvenient
- ✗ Collection is inconsistent
- ✗ Experience is fragmented

✓ WITH REKART

- ✓ Simple access for everyone
- ✓ Convenient user experience
- ✓ Organized recycling workflow
- ✓ Responsible disposal pathways

The Team Behind ReKart

Building toward a simpler and more accessible recycling ecosystem.

 OUR VISION

Building India's Circular Economy

Mission: "To make responsible recycling simple, transparent, and accessible for every household and institution."

"Every recyclable item deserves a second life."

Don't Throw It. **ReKart** It.
